Creation – object to one's own consciousness

Spirit becomes the Universe

- Mind is a final action of Supermind in the descent toward creation
- Life is an action of Conscious-Force working in conditions of the Ignorance created by descent of Mind
- Matter is the final form Conscious-Being takes as the result of that working

Why Matter?

- Division is essential for Infinite manifestation
- Matter is the result of the will to manifest multiplicity of being in separate centers of consciousness

Separateness is a Fiction

- No human can exist without society
- No form can exist without Spirit
- Ego creates the illusion of separateness
- To become an individual is to be conscious of our oneness with others

Matter is Sachchidananda

- Being manifest as substance
- Consciousness expressing itself as Force
- Force cast into form
- Delight offering itself to its own consciousness as object

Thank You
